

Lee Clappison

Senior Colourist

mobile: 0773 6688991

email: thegrademonkey@gmail.com

BIO

My passion for film has led me to work in the heart of the vibrant UK Film and TV industry and have succeeded in achieving the level of Senior Colourist at Post Production facilities such as Goldcrest, Molinare, LipSync and Suite in London, specialising in Feature Film and TV work. I am currently a freelance Senior Colourist in London.

My work ethic ensures that I produce grades of the highest quality and have had the privilege to be involved with Oscar and BAFTA nominated films, including "Shame", "My Week with Marilyn", "Calvary" and "Denial", working with Academy Award winning directors such as Steve McQueen and Kenneth Branagh, as well as some of the finest cinematographers in the business such as Haris Zambarloukos, Chris Ross, Remi Adefarasin, Sean Bobbitt, and Autumn Durald Arkapaw to name a few. As well as grading high profile TV shows, such as "Heartstopper", "Time", "Watership Down", "Red Riding", "Bulletproof" and "Toast of Tinseltown".

After 20+ years of working with images, across multiple genres, I have gained a great knowledge and understanding of what is required to interpret my clients' vision, and bring that to the screen with accurate attention to detail. I have a vast experience of working with various cameras and lenses, and have been able to advise my clients early on in the pre-production stage to ensure they get the best results from their images. I am an accomplished user of Baselight, DaVinci Resolve, Quantel iQ/Pablo/Neo and Nucoda and always willing to try new systems and technologies.

I am familiar with all areas of production and post production, from the creative processes to the strategic planning aspects and workflow methods. My extensive experience enables me to lead a team pulling from a wealth of knowledge and relationships across the Film and TV industry, and have the ability to multi-task and remain composed under intense pressure, enabling me to manage and deliver jobs successfully to tight deadlines.
