## SUMMARY

Passionate about photography and videography since 2013, I began my journey with a basic photography course. Since then, I have continued to educate myself through self-study with books and online courses, focusing particularly on video and specializing in **DaVinci Resolve**.

With a background in music, I have spent years creating **music videos**. I have handled all aspects of production, excelling notably in **color grading**, which is the aspect I am most passionate about and through which I best express myself.

Recently, I started a collaboration with another videomaker under the name **Lab Studio**. After completing several smaller projects, I have had the opportunity to fully manage the color grading process in significant projects, including the short film "**Afonia**," selected at the **GLocal Film Festival 2023**.
